Employment

Tech Lead Data & AI Engineer **Dec 2023 - Present**
Mercedes-Benz Group Services, Madrid (remote)

- Lead Data Engineering and Generative AI initiatives, designing scalable lakehouse solutions with Databricks, Spark and Azure.
- Support monthly vehicle marketing campaigns across multiple markets, processing data for approximately 100–150K leads per month.
- Drive engineering standards, backlog prioritization and continuous improvements in team delivery practices.
- Bridge business and engineering teams, translating commercial needs into technical requirements and improving delivery predictability.
- Coordinate a team of ~8 people: engineering standards, design reviews and architecture decisions.
- Built a production multi-agent system that flags, corrects and verifies data-file errors with human sign-off; data quality centralised in Unity Catalog and queryable with Genie.
- Drive technical debt reduction through prioritization, targeted improvements and engineering roadmaps.

Technical Product Owner **Nov 2022 - Dec 2023**
Mercedes-Benz Group Services, Madrid

- Translated business requirements into technical specifications, user stories and acceptance criteria with business, Data Engineering and development teams.
- Defined and prioritised the Product Backlog, aligning business needs with technical solutions.
- Defined the technical roadmap and made technical decisions on architecture and code review.
- Oversaw data ingestion, transformation and quality in Big Data environments for scalable, reliable analytics.
- Power BI solutions: KPI definition, data modelling, dashboard design and report performance optimisation.

Senior Cloud Data Engineer **Sep 2020 - Nov 2022**
Mercedes-Benz Group Services, Madrid (remote)

- Design and develop scalable Data Engineering solutions for Mercedes-Benz after-sales use cases.
- Build data pipelines using Databricks, Apache Spark, Python, Azure Data Factory, ADLS and Delta Lake, processing ~5M records monthly
- Implement CI/CD and Agile delivery practices using Azure DevOps and Jira.
- Collaborate with international business and technical stakeholders across multidisciplinary teams in English.

Co-Founder **Aug 2019 - Apr 2021**
Real Stocks (side project), Madrid

- Co-founded and managed a technology services business, overseeing solution architecture, project delivery, customer acquisition and financial

Azure Data Lake Storage (ADLS)

Education

Upper technician at Multiplatform applications development
IES Juan XXIII
2012 - 2014

Upper technician at Electronic Products Development
IES Prado de Santo Domingo
2010 - 2012

operations.
- Managed projects using Agile methodologies including Scrum and Kanban.
- Defined and executed community management and customer engagement strategies.
- Oversaw billing, costs and budget management.

Big Data Engineer **Jan 2019 - Sep 2020**
StratioBD, Madrid
- Big Data batch processing for Carrefour's transformation programme (~8M records/day): stock management, shelf-life analysis and operational gap forecasting.
- Spark, Scala, Kafka, Kudu and Cloudera; CI/CD with Jenkins, Git and Bitbucket.

Big Data Engineer **Feb 2018 - Jan 2019**
Strategy Big Data, Madrid
- Ferrovial R&D: data pipelines with Azure Data Factory, Python, Spark and ADLS, plus AWS Athena and Glue.
- SGAE: reporting and billing platform with Scala, Spark, HDFS and Airflow, plus Elasticsearch and Kibana.

.NET Fullstack developer **Jan 2017 - Feb 2018**
Altran, Madrid
- Developed mission planning systems for Airbus Defence and Space (A400M MPRS and C295 NeTAMPS) in C#/.NET and WPF.
- Built desktop features with MVVM and Prism, including map-based planning with the Carmenta GIS engine.
- Data access with NHibernate and LINQ over SQL Server and Oracle, in Scrum teams using TFS.

.NET Fullstack developer **Feb 2015 - Jan 2017**
M2C Consulting, Madrid
- Desktop apps and web/mainframe automations (C#, WPF, SQL Server) for Banco Santander's process efficiency department.
