Employment

Tech Lead Data & AI Engineer — **Nov 2022 - Present**
Mercedes-Benz Group Services, Madrid

- Lead Data Engineering and Generative AI initiatives, designing scalable lakehouse solutions with Databricks, Spark and Azure.
- Support monthly vehicle marketing campaigns across multiple markets, processing data for approximately 30–50K leads per month.
- Drive engineering standards, backlog prioritization and continuous improvements in team delivery practices.
- Bridge business and engineering teams, translating commercial needs into technical requirements and improving delivery predictability.
- Promote Generative AI adoption through AI agents, RAG and harness engineering to automate workflows and improve engineering productivity.
- Drive technical debt reduction through prioritization, targeted improvements and engineering roadmaps.

Senior Cloud Data Engineer — **Sep 2020 - Nov 2022**
Mercedes-Benz Group Services, Madrid

- Design and develop scalable Data Engineering solutions for Mercedes-Benz after-sales use cases.
- Build data pipelines using Databricks, Apache Spark, Python, Azure Data Factory, ADLS and Delta Lake, processing ~5M records monthly
- Implement CI/CD and Agile delivery practices using Azure DevOps and Jira.
- Collaborate with international business and technical stakeholders across multidisciplinary teams in English.

Co-Founder — **Aug 2019 - Apr 2021**
Real Stocks

- Co-founded and managed a technology services business, overseeing solution architecture, project delivery, customer acquisition and financial operations.
- Managed projects using Agile methodologies including Scrum and Kanban.
- Defined and executed community management and customer engagement strategies.
- Oversaw billing, costs and budget management.

Big Data Engineer — **Jan 2019 - Sep 2020**
StratioBD, Madrid

- Developed Big Data batch processing solutions for Carrefour's technical transformation program (SHERPA).-Delivered solutions for stock management, product shelf-life analysis and operational gap forecasting.
- Worked with Spark, Scala, Kafka, Kudu and Cloudera across distributed Big Data environments.-Applied Agile/Scrum practices and CI/CD using Jenkins, Git and Bitbucket.
